DETAILED ACTION***Drawings***

The drawings are objected to because Figure 22(f) is not shown in the drawings. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 116 is objected to because of the following informalities: the claim is dependent upon cancelled claim 14. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 105,107,137,138, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The “at least one hollow protuberance” lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 104-106 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,262,128 ('128).

The '128 patent discloses a substrate (12) which comprises a plurality of wells (18) and positioned below the well (18) is a pit (18). Another plate (22) comprising a plurality of emitters (24,40,44), is lowered upon the substrate (12) allowing the emitters to come into alignment with the wells and penetrating the cells. So in the co-joined position the two plates form the claimed elements. The language, “enucleation pit for isolating the nucleus from cell” is considered intended use, carrying no patentable weight.

Art Unit: 1744

Claim 126 is rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,526,376 (Callan et al.).

Callan discloses a centrifugal platter (12) which comprises a plurality of chambers at the periphery of the platter (12) which are considered to be capable of holding a MEMS device. The cover (10) further adds to stabilizing the MEMD in the chambers. Again the intended use language in the claims is of no patentable weight.

Response to Arguments

Applicant's argument that USP 5,635,358 fails to teach or suggest a well having a pit in combination with a penetration member is persuasive and the rejection has been withdrawn.

Allowable Subject Matter

Claims 107-112,114-125,127-136 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 105-107,137,138 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
